EDUCATION

SRM Institute of Science and Technology

Bachelor of Technology in Information Technology | CGPA: 7.7/10.0

Chennai, Tamil Nadu

Jun 2023 – May 2027

L M Dadha Senior Secondary School

Higher Secondary Education (Class XII – PCM) — 60.1%

Chennai, Tamil Nadu

Apr 2022 – May 2023

EXPERIENCE

AI Intern

Jan 2026 – Present

Applied Systems Research & Technology Pvt Ltd

Remote

- Contributed to the development of an AI infrastructure monitoring platform providing visibility into GPU, compute, storage, and networking resources used in AI workloads.
- Developed backend services using FastAPI, PostgreSQL, Redis, and TimescaleDB for collecting, storing, and analysing infrastructure telemetry data.
- Implemented monitoring and analytics workflows to identify resource bottlenecks, performance anomalies, and infrastructure health issues across distributed AI environments.

PROJECTS

Telco Customer Churn Analysis | *SQL, Python, Power BI, Scikit-Learn* | [GitHub](#)

2026

- Built an end-to-end customer churn analytics platform analysing 7,043 telecom customers and identifying \$139K monthly revenue at risk through SQL-based customer segmentation and business analytics.
- Developed a 7-page Power BI decision-support suite featuring AI-driven churn prediction, customer risk intelligence, voice-of-customer analytics, and retention simulation, powered by a Random Forest model achieving 84.3% ROC-AUC and 80.7% accuracy.

Enterprise Fraud Risk Pipeline – SentinEdge | *Python, Scikit-Learn, Power BI, DAX* | [GitHub](#)

2026

- Built a fraud detection platform analysing 56,962 financial transactions and addressing extreme class imbalance (0.17% fraud rate) using SMOTE and Random Forest classification.
- Achieved 99.85% accuracy and 83.67% fraud recall while developing a 4-page Power BI business intelligence suite for fraud investigation, model validation, and business impact analysis.

FlexiMart Data Engineering Pipeline | *Python, MySQL, MongoDB, SQL* | [GitHub](#)

2025

- Designed and implemented a retail data platform comprising Python ETL pipelines, a normalised MySQL database (3NF), MongoDB storage, and a dimensional data warehouse.
- Built star schema warehouse models and advanced SQL analytics using CTEs, window functions, and customer value segmentation to support business reporting and KPI generation.

TECHNICAL SKILLS

Programming: Python, SQL, Java (Familiar)

Data Analytics & BI: Pandas, NumPy, Matplotlib, Power BI, DAX

Machine Learning: Scikit-Learn, Random Forest, XGBoost

AI & LLM Applications: LangChain, LangGraph

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Redis

Backend Development: FastAPI, Flask, REST APIs

Tools & Platforms: Git, GitHub, Docker, Jupyter Notebook, Google Colab, VS Code

CERTIFICATIONS

Big Data Computing – NPTEL

2025

Introduction to Business Intelligence – Infosys Springboard

2025

MongoDB Basics for Students – MongoDB University

2025

LEADERSHIP & ACTIVITIES

Treasurer – CHAT Club (IT Department)

2024 – Present

SRM Institute of Science and Technology

Chennai, Tamil Nadu

- Participated in technical workshops, AI-focused peer learning initiatives, and collaborative innovation events in software development and machine learning.
